Dr. James W. Holley III
Mayor

February 12, 2010

Dear Olde Towne Resident:

As you may know on January 26, 2010, City Council was presented with four potential action items with regards to the flooding which continues to occur in Olde Towne. After review of these items, City Council directed Staff to immediately begin the following two items:

- 1) Replace the existing Crawford Parkway bulkhead (Seawall) and reconstruct Crawford Parkway.
- 2) Complete and share the findings of the updated version of the Dinwiddie Pump Station project.

The attached informational bulletin will give you more detail and the projected dates of these projects. Also contained in this bulletin are the other two action items which will be long term projects.

Sincerely,

Dr. James W. Holley III
Mayor
